Assessing species and reserve vulnerability to climate change in the Willamette Valley ecoregion

Original research conducted by graduate student working group
from University of California, Davis
Project supported and funded by the
UCD Conservation Management Program

Partnering with Defenders of Wildlife and Oregon Department of Fish
and Wildlife

Where: Oregon Dept of Fish and Wildlife headquarters
Grouse Conference Room, 3rd floor
3406 Cherry Ave NE, Salem OR 97068
When: 8:30 AM – 12:00 PM
Friday, Feb 18th 2011

Please **RSVP** with name and organization to mlwilkerson@ucdavis.edu and
art.c.martin@state.or.us by **Feb 17th**

Objectives:

- Presentation of **vulnerability** assessment for the 46 Strategy Species and 27 Conservation Opportunity Areas in the Willamette Valley ecoregion
- Presentation and discussion of **framework** for species vulnerability assessments
- Feedback on suggestions for **management prioritization** for climate-imperiled species
- Feedback on options for **management action adaptations** for species taxa and conservation areas
- Planning for **next steps** in the OCS climate change revision process

For more information/questions, please contact Marit Wilkerson (Ecology graduate student at UC Davis) at mlwilkerson@ucdavis.edu or (940) 390-4984

For morning-of emergencies, please call Art Martin at (503) 947-6082 (office) or (503) 789-9376 (cell)
